Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/765,933	Applicant(s) ISHIZAKI, MORIO	
	Examiner Keith Walker	Art Unit 1745	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Group II, Claims 3-5 in the reply filed on 3/9/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-5 are pending in the application and claims 1 and 2 are withdrawn.

Claims 3-5 are pending examination as discussed below.

Information Disclosure Statement

The information disclosure statements filed on 1/29/04, 4/22/05, 6/13/05 & 11/18/05 have been placed in the application file and the information referred to therein has been considered as to the merits.

Drawings

The drawings received on 1/29/04 are acceptable for examination purposes.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The

Art Unit: 1745

abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 6,258,480 (Moriwaki).

Moriwaki teaches a manufacturing method for a battery by preparing a material corresponding to the shape of the can and forming a cylindrical body by deforming. The sidewall thickness is subjected to press working to form a large thickness portion at the end portion and a small thickness. The press forming is done such that a distance between an outer circumferential surface of said large thickness portion and said central axis is equal to a distance between an outer circumferential surface of said small thickness portion and said central axis, and a distance between an inner circumferential surface of said large thickness portion and said central axis is smaller than a distance between an inner circumferential surface of said small thickness portion and said central axis (Abstract; Figs. 1 & 2; 6:40-65).
